- **Creative Problem solver**
- **Team Player**
- **Responsible**
- **Self Motivated**

Technical Skills
- **Computer Science**
- **Python**
- **HTML**
- **CSS**

Portfolio

[Link to portfolio in future]

My passion is to pursue a career within the innovative tech industry, utilizing the skills I have gained in software development and user interface design. I love to learn new skills and apply them to my work. I am a hardworking and driven team player who has gained a multitude of soft skills such as problem solving and customer service, which I have developed through a history of multi-disciplinary part-time work. My experience in practical computer science projects has helped me to develop an understanding of multiple programming languages. I am always open to pursuing new skills and am willing to learn and adapt ware necessary in order to add value to the company.

Projects and Experience

2023- 2025
Chelmsford College

BTEC level 3 Extended diploma in Software development

I study a full time 2 year course in software development. During these years I get to develop skills in things such as website development , games development , 3D and 2D graphics and programming.
